Bruno Fellps

iGaming Designer · Slot Game Art & UI

10+ years in graphic design · iGaming and slot game art since 2024 · 15+ slot games produced

Graphic designer with 10+ years of experience across branding, web and advertising, now focused on iGaming. I create the visual worlds of casino and slot games: full 2.5D asset sets with characters, symbols, backgrounds and in-game UI, plus casino marketing visuals. My work focuses on high-contrast, dark-mode art with rich lighting, glow effects and metallic textures. I can study a reference style and match it consistently across a whole asset library, then deliver clean, organized files for developers.

EXPERIENCE

Gaming Designer
Jan 2024 – Present

Tigoo Studios · Belo Horizonte, Brazil

- Create slot game art for iGaming products: in-game UI elements, 2.5D characters, symbols and backgrounds.
- Design promotional materials for game launches, matching each game's visual style.
- Produce launch materials and social content for the studio's slot game releases on LinkedIn and Instagram.
